

RECO

LIFT SOLUTIONS

**For over 20 years
specialist in rental
of temporary lifts**

LIFT ASSISTANT

READY TO HELP THE RESIDENTS

Residents may have questions during maintenance or lift malfunction in a housing complex. Our lift assistant is deployed to speak to residents personally and to help them during the period of maintenance. Before the work starts, the lift assistant visits each of the residents to introduce himself and to ask if there is anything he can do for them.

Our lift assistant also helps the residents with their daily activities. Examples are doing the groceries, picking up the newspaper or walking the dog. The lift assistant is also often chosen to help residents with the use of temporary stairlifts.

- Always friendly and polite
- Helpful for every resident
- Quickly and flexibly deployable

STAIRLIFT

EASY AND FAST TO USE

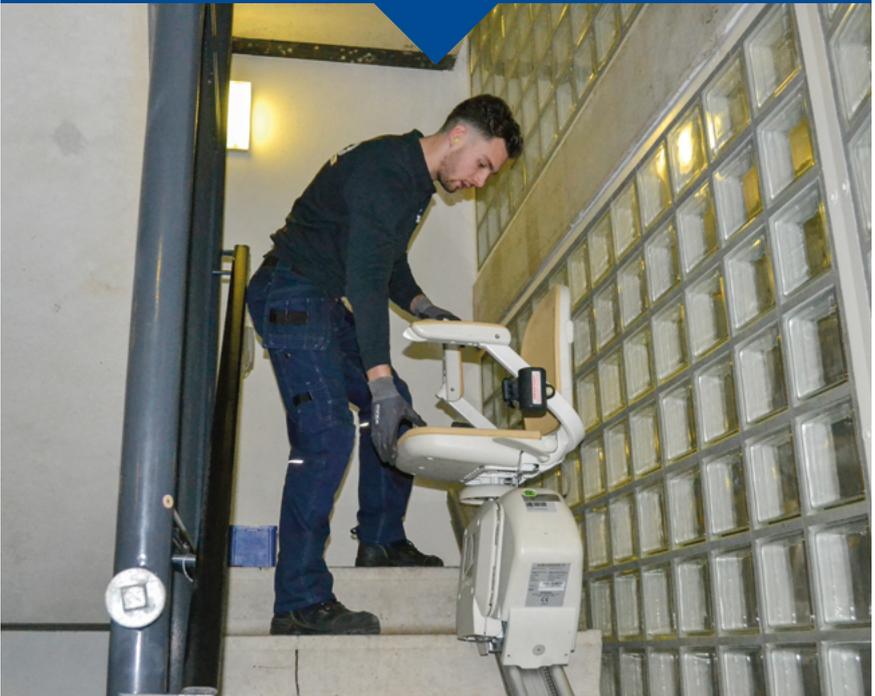

When your lift is out of order due to a malfunction or maintenance, a stairlift offers a quick and easy temporary solution. Because stairlifts are installed in just 30 minutes per floor, the residents of the building can be out and about again within hours.

TAILOR-MADE STAIRLIFT RENTAL

Our stairlifts can bridge any straight staircase up to a maximum distance of 7 metres between the floor and the top steps. The stairlift can carry up to 127 kg. If this is not enough, you can opt for heavy-duty stairlifts. This stairlift can carry up to 159 kg.

A remote control with instructions is attached to the top and bottom of the rails so that anyone can easily use the RECO stairlift. We recommend using our stairlift up to a maximum of 4-5 stops. It is important to note that residents need to change from one stairlift to another.

- Fast assembly
- 24/7 service
- Suitable for any straight staircase
- Can also be rented in a weatherproof version

RECO PASSENGER LIFT

A FULLY-FLEDGED LIFT, INSTALLED WITHIN 48 HOURS

When residents are dependent on a wheelchair or mobility scooter, a stairlift or lift assistant does not offer enough mobility. Without additional mobility, they would be forced to stay in their flat.

With the RECO passenger lift, we offer a temporary replacement that we can build quickly. So within 48 hours, you have a fully-fledged temporary lift in place. The emergency lift has a barrier-free entrance and is therefore easy to access with wheelchairs, rollators and stretchers. The lift is constructed using a modular lift shaft, which also makes it weatherproof. The RECO lift therefore literally goes through all kinds of weather for residents and visitors.

- Suitable for mobility scooters
- User-friendly
- Barrier-free
- Weatherproof

EMERGENCY PLAN

In the event of a lift failure, you as a building owner or housing association must act quickly. It is not efficient to discuss a temporary solution every time there is a malfunction. You can have RECO Lift Solutions draw up an emergency plan. In this action plan, we agree on what should happen when the lift unexpectedly fails. This guarantees that you will have a temporary mobility solution for your residents within an agreed timeframe! Below are several actions that we can include in your emergency plan.

LIFT ASSISTANCE

- Present within 4 hours
- First aid in case of lift failure
- Assist residents with questions

STAIRLIFTS

- Fastest deployable emergency lift
- Fits in every staircase
- Installation in 30 minutes per floor

RECO PASSENGER LIFT

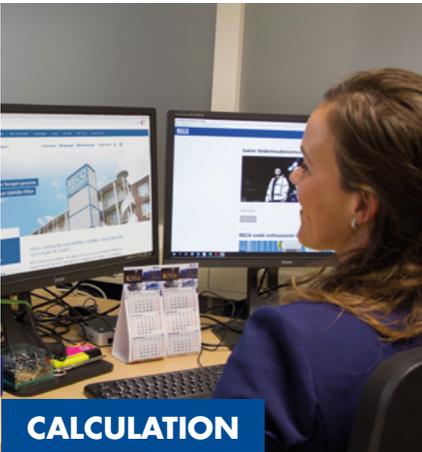

- Installed within 48 hours
- User-friendly and barrier-free
- Suitable for mobility scooters
